

Serial No. 09/604,835

2

**IN THE SPECIFICATION**

Please replace the paragraph beginning on page 5, line 17, with the following:

*A1  
concl.*

Figure 2 is a flow chart showing a first pull method 200 for demand-casting video segments in accordance with an embodiment of the present invention. The first pull method 200 involves pointcasting and provides a requesting viewer with access to a video segment starting at its beginning (or any other selectable point within the video segment). As described below, the method [[400]] 200 includes three steps.

Please replace the paragraph beginning on page 13, line 29, with the following:

*A2  
concl.*

Figure 7 depicts an example of an IPG screen in accordance with an embodiment of the present invention. The video segment 700 of Figure 7 comprises a first 705A, second 705B and third 705C time slot objects, a plurality of channel content objects 710-1 through 710-8, a specific content object 711H, a pair of channel indicator icons 741A, 741B, a video barker 720 (and associated audio barker), a cable system or provider logo 715, a program description region 750, a day of the week identification object 731, a time of day object 739, a next time slot icon 734, a temporal increment/decrement object 732, a "favorites" filter object 735, a "movies" filter object 736, a "kids" (i.e., juvenile) programming filter icon 737, a "sports" programming filter object 738 and a VOD programming icon 733. It should be noted that the day of the week object 731 and next time slot icon 734 may comprise independent objects (as depicted in Figure 7) or may be considered together as parts of a combined object.
